

## Assignment

# Codecademy HTML & CSS Tutorial

---

During this class, you will regularly be interacting with a wide variety of online tutorials. During this module, we will be utilizing selected Codecademy tutorials from:

<http://www.codecademy.com/>

### Codecademy: HTML & CSS Contents

Introduction to HTML
HTML Structure: Using Lists
HTML Structure: Tables, Divs, and Spans
Introduction to CSS
CSS Classes and Ids
CSS Element Positioning

During the Module One Exam, you will be tested on the information in this tutorial. It is estimated that the tutorial will take a novice seven hours to complete.

### Deliverable

For your online portfolio, you are expected to create a page that demonstrates that you have completed this tutorial. It is expected that the page will include images that provide evidence of your work.

In addition, your web page should include some reflections (three or four sentences) concerning what you have learned. For example, you might discuss how this material is relevant and important to the course.
