

Assignment

W3Schools HTML/CSS/Bootstrap Tutorials

During this class, you will regularly be interacting with a wide variety of online tutorials. For this assignment, we will utilize the HTML, the CSS, and the Bootstrap tutorials from W3Schools at:

<http://w3schools.com/>

Complete each of the tutorials. At the end of each, you will find a quiz. Take each quizzes. After you complete each quiz, capture the graphic that displays your score.

Challenge Option

If you are already familiar with HTML and CSS, you are welcome to challenge the W3schools quiz. If you score 90% or better, you can consider your challenge successful.

Deliverable

Create a web page that displays the images that show your score from each to the tutorial. On that page, add enough text so that a reader can understand what material was in each tutorial, how the materials relates to our class, and why the material is important.

Post that page to the Assignments section of your online portfolio.
